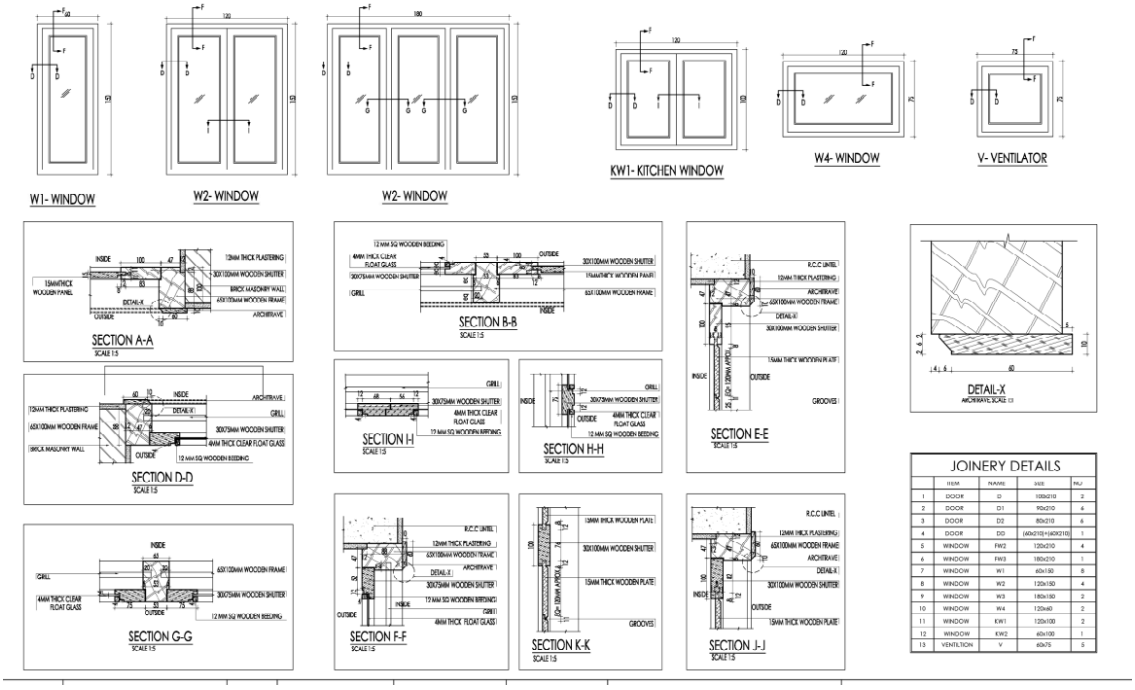
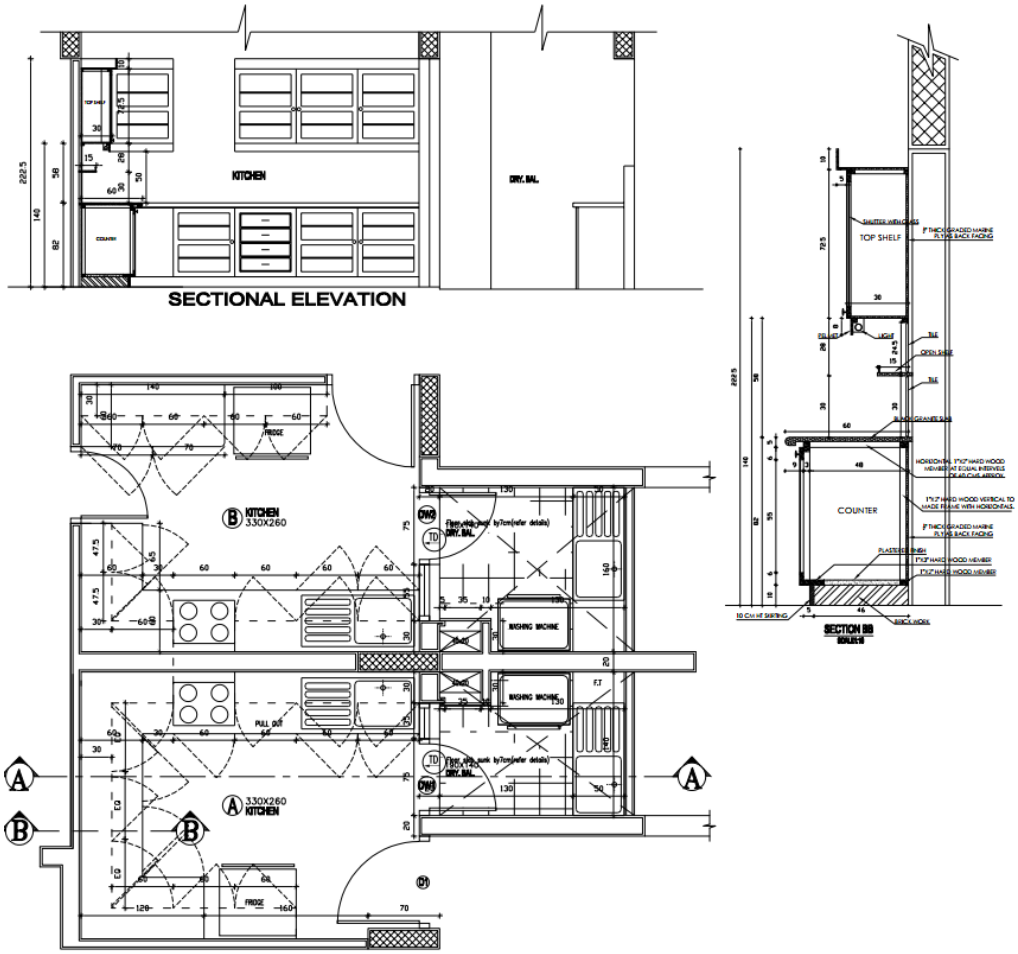
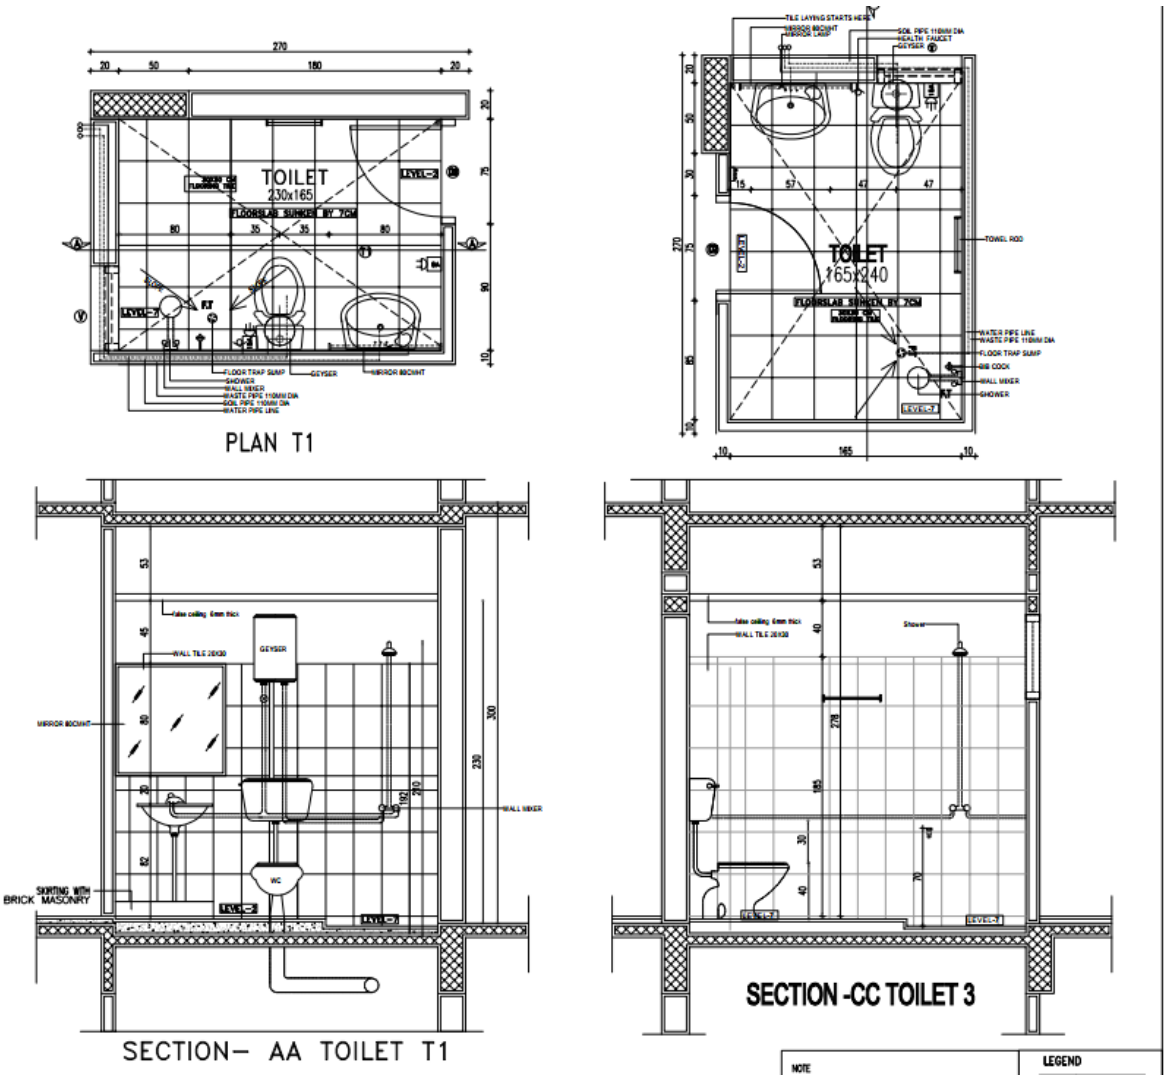
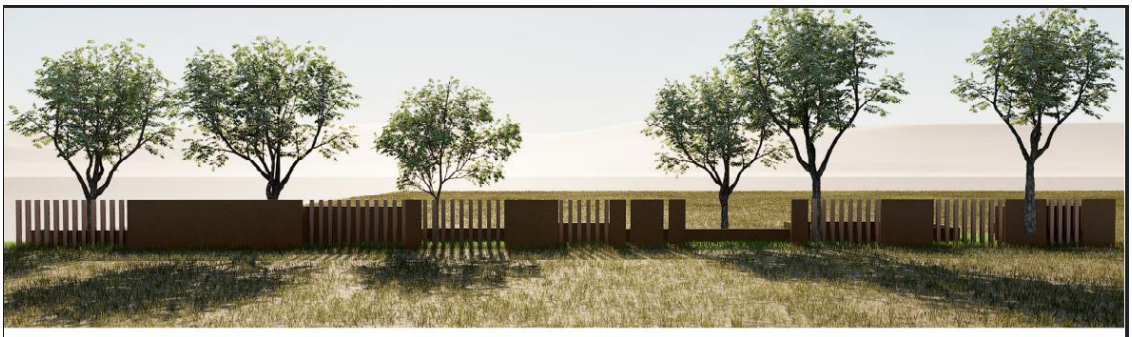
2. Fabrication Drawings
    - Shop-ready details for kitchens, cabinets, wardrobes, or custom furniture for contractors and builders.







3. Fencing Drawings
    - Aluminium/metal fencing fabrication and assembly drawings.
    - 3D options for various fencing

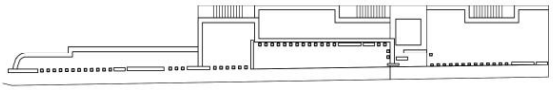


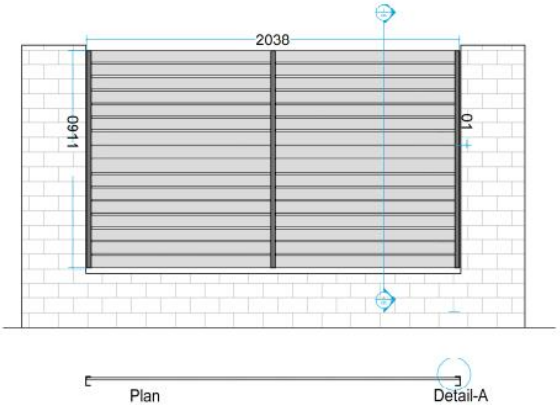
Scope of Works & Fencing Options

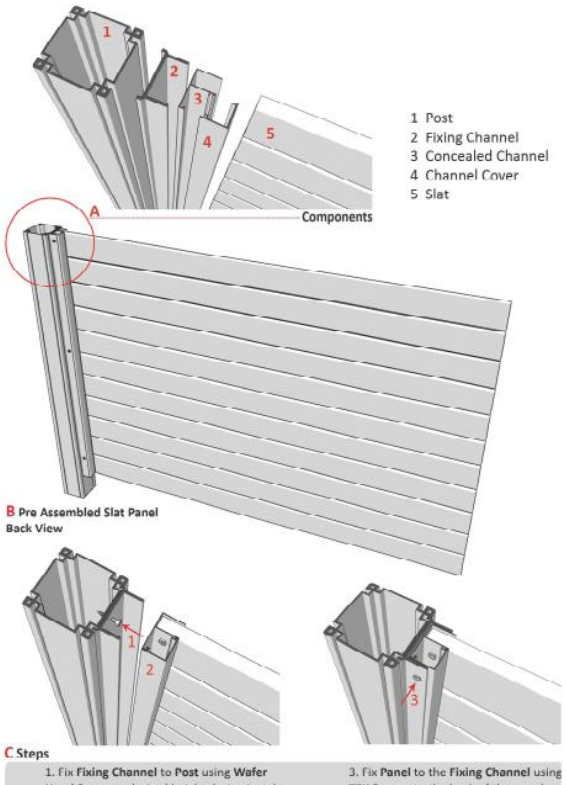
Two fencing systems were proposed to suit varying site conditions:

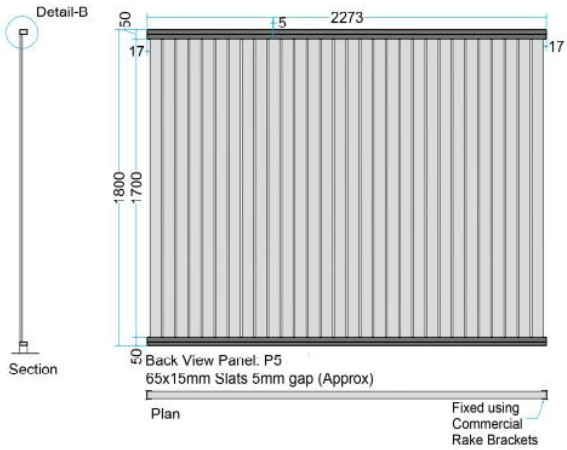
1. 40x40mm Vertical Batten Fencing – 100mm Gap
   - Clean, open aesthetic to maintain visual transparency
   - Ideal for defining green perimeters and areas requiring passive surveillance
   - Coordinated with shade structure columns and landscaping lines
2. 100x100mm Vertical Batten Fencing – 100mm Gap
   - Bolder visual impact and stronger territorial definition
   - Suited for high-traffic interfaces (e.g., Woodberry Street edge)
   - Considered for use as screening against adjacent residential zones

visual screening in high-traffic and private areas







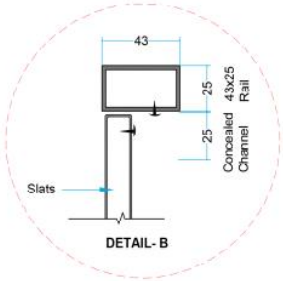


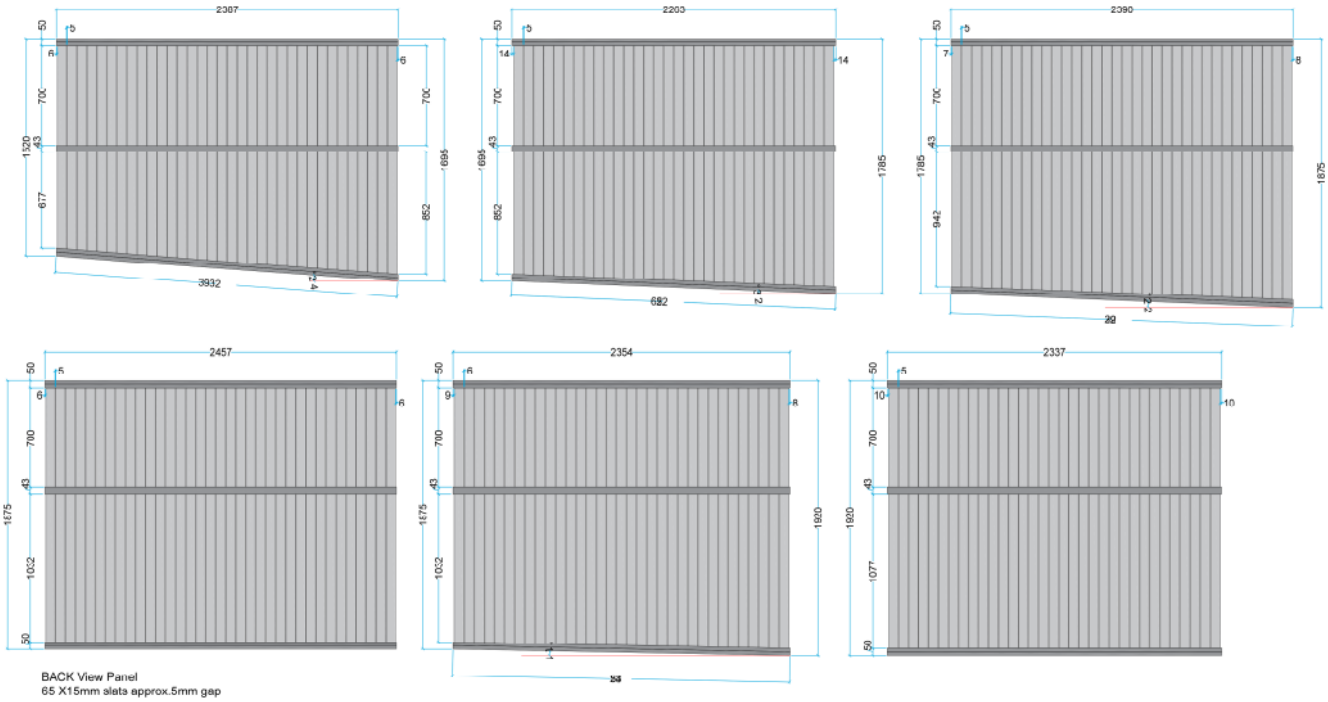
Back Fence

- Profile: 65x15mm vertical slats with custom spacing
- Finish: Powder-coated Monument finish

Key Features:

o Vertical design provides a bold architectural statement
o Slats help create a modern backdrop while complementing decorative elements like the lion statue
o Available in various blade widths and gaps for customizable aesthetics
o Durable and maintenance-free in harsh outdoor conditions
- Architectural Detailing:
o Vertical rhythm chosen to echo the proportions of the lion statue and add a sculptural quality
o Fence height coordinated to frame the statue without visually overwhelming it
o Designed to blend with rear landscaping, ensuring a cohesive courtyard environment





4. 3D Visualization / Modelling
    - Realistic 3D models, perspectives, or images from plans for presentations.
    - Helps builders and designers present to their clients
    - 3D Interior layouts for clients to understand daylight, circulation, and ergonomic layout planning.

P6 | SKS OFFICE

View of CEO's office with illumination from the cylinder: cove of the ceiling and bottom of the desk top at the rear

View of discussion area and studio showing natural and artificial illuminations in various ways. Mirror is used to create the illusion of space, camouflage the cabinet and reflect light

View of the studio with diffused illumination

1. Opaque, white cylindrical tube is placed below the glazed skylight to let the light bounce down to the work space. Florescent tubes are hidden to provide similar light in the ground floor.

2. Source of light concealed in the cove of the false ceiling

3. Source of light concealed in the cove of the wall panel.

4. Source of light hidden inside the vertical slit of in the wall covered on both sides with frosted glass panel to cause illumination in area on both sides of the wall.

5. Light source below the frosted glass table top of the Architects desk to illuminate worksheet from blow

7. Light the reception fixed behind the frosted glass panel

8. Mirror fixed opposite to the main door to reflect the light coming through the glass pane of the door and also to reflect the opposite tree
